Books Covering 1968 Chevelle (early with the round head mirror and bowtie). It features the Correct Chevy bowtie logo on the head of this exterior mirror. 1966 1967 Chevelle. 1968 Impala's except the sport coupes. The Chevrolet Turbo-Air 6 is an air-cooled automobile engine developed by General Motors (GM) in the late 1950s for use in the rear-engined Chevrolet Corvair of 1960. The engine has six cylinders arranged in a horizontally-opposed boxer configuration. The Turbo-Air 6 was used in the Corvair and all models derived from it, as well as a wide variety of other applications.
