SUSE® Linux Enterprise Server for SAP Applications is the reference platform for the software development of SAP. It is optimized for SAP applications. The big enterprise IT vendors -- IBM, Microsoft, Oracle, and SAP -- all want you to buy more and pay more. Here are some tactics for you to protect your organization and get the best deal as you plan and engage in negotiations with them. ZDNet's technology experts deliver the best tech news and analysis on the latest issues and events in IT for business technology professionals, IT managers and tech-savvy business people. The power of SAP's integration is the most powerful advantage for businesses that implement the solution. This integration is both within the "Enterprise Core Component" (ECC or its base ERP solution), across the Netweaver Platform, its composites (which are often derivative expansions of the core ECC functional modules), and external applications (i.e., PDM, MES, etc.).
