A diesel engine is an internal combustion engine What is the correct amount of oil in the engine of a 120 model diesel; the old motor, not the D4D. I have been told that if you check the oil level cold, then it will show about 1cm above the top level mark on the dip stick and if the level is checked with the engine hot, the level is right on the top mark on the dip stick. Had this happen to a mates 80 a couple of years ago on a trip away.... You will need to buy a couple of appropriate sizes easy-out extractor tools and use them.
