

# Download Perkinelmer Opera User Manual

The Opera Phenix™ High Content Screening System is the premier confocal solution for today's most demanding high content applications. Drawing on over a decade of experience with the industry-leading Opera® High Content Screening System, the Opera Phenix is designed for high-throughput, phenotypic screening and assays involving complex disease models, such as live cells, primary cells and ...Enable New Discoveries by Observing and Measuring the Molecular Organization in Unstained Samples Because Abrio™ imaging systems do not require the use of labels or stains, the biology of structures is unaltered, yet the detail provided is on par with fluorescence imagery. PerkinElmer's Operetta™ and the new Opera Phenix™ high-content imaging systems utilize a confocal spinning-disk design, which provides high-resolution images of 3D cell-culture models.
