

Download Winning On Wall Street How The Game Is Played

Making money on Wall Street is hard – and it's designed to be that way. Most people don't realize how the game is rigged against them. As a result, they end up losing their hard-earned money. Winning on Wall Street is a stock game with a spinner. Players buy stock then use the spinner to determine if the stock goes up or down. The 30 stocks used represent the Dow-Jones stocks as of May 1998. It does to me, except it requires having access to information that only a select few on Wall Street are privileged to know. You and I will never beat Wall Street at its own game. However, that doesn't mean we can't play a few games of our own. In fact, my colleague Jim Fink has developed a system that even Wall Street can't match. How I Won 1st Place In Wall Street Survivor In 5 Easy Steps On Election Day, I won 1st Place in the Beehive game of Wall Street Survivor set up by my friend and fellow stock-geek Mark Poncelet. I virtually booked a 14.26% total portfolio gain in 3 months which ranks as one of my best runs ever.
